

This separator/blowcase package is sitting near Red Deer and available for immediate redeployment at an unbeatable price. This separator was out on rent for about 6 months and still shows as new. Built to TransCanda spec, it has a lot great features such as WKM valves and first class instrumentation package. The building is fully wired to JB's including lights, gas detection, exhaust fans, and heaters. Of course, you may not need the blowcase, and would like it dressed 3 phase OR for a more traditional configuration. All modifications required or desired, can be handled right on site by a first rate fabricator.
